Developing CCSESA recommendations on Special Education

The 2019-20 state budget included \$645.3 million in ongoing funding for special education distributed as \$152.6 million for AB 602 rate equalization and \$492.7 million for early intervention. The budget also stipulated that this funding will only continue in subsequent years if the Director of Finance and the Chair and Vice Chair of the joint Legislative Budget Committee concur that the 2020-21 budget agreement contains statutory changes to improve the academic outcomes of individuals with exceptional needs. The language adds that such changes may include, but are not limited to, the following topics:

- a) An examination of the role of SELPAs in the delivery of special education services and supports for special education students, including increasing accountability and incorporation into the statewide system of support
- b) Expansion of inclusive practices to ensure that every special education student has access to learn in the least restrictive environment
- c) Opportunities for LEAs to receive state and regional support to address disproportionality of special education identification, placement, and discipline, as applicable, and ensure equitable access to services for special education students
- d) Review of existing funding allocations for special education
