COVID -19 Meeting Protocol - Required

For any in-person meeting, all participants are required to follow the city/county guidelines as determined by the local public health department of the city/county that you will be meeting in, which in this case is San Francisco, CA. For this reason, as of September 22, 2021, San Francisco city and county requires masking indoors in public spaces, including hotels, regardless of vaccination status. The full public health order, effective since September 10, 2021, can be found [HERE](#). We will be complying with this public health order throughout the duration of our meeting time, so please plan accordingly.

In addition to the above protocol, it is also required that as school officials, you follow the K-12 guidance as issued by the California Department of Public Health for your meetings, to model what is required on our school sites. Since you are all employees of county offices of education, it is assumed that you are following this protocol, effective October 15, 2021 per the public health order issued August 11, 2021 found [HERE](#), so no further proof is needed for us to confirm. Your employer on record holds this information and can be called upon in the event of a need to supply this information for contact tracing purposes.
